CORE COMPETENCIES

Agentic AI UX
AI Agents & Copilots
Human-in-the-Loop Design
AI Governance & Guardrails
Explainable AI & Trust
Conversational UI
Multi-Agent Workflows
Prompt & Evaluation UX
Enterprise SaaS & B2B
Information Architecture
Design Systems
Prototyping
User Interviews & Surveys
Brainstorming & Card Sorting
Personas, JTBD & Journey Maps

EDUCATION

B.Des, National Institute of Design (NID)
Kurukshetra · 2016 – 2021

Internships: Dorling Kindersley India (2020), Fisheye Design (2019)

AWARDS

DNA Paris Design Awards 2024
Winner · Ranbhoomi Kurukshetra

TOOLS

Figma, Figma Make, Principle, Adobe CC, Miro, Notion, Claude, ChatGPT, Gemini, Cursor, Lovable, v0

PLATFORMS

Copilot Studio, Dynamics 365, Agent 365, Agentforce, watsonx Orchestrate, OpenAI AgentKit

AI product designer with 5+ years in design, building agentic AI that enterprises can trust. I own product design for ZBrain at The Hackett Group and have designed copilots and AI agents for Microsoft.

Specialist in human-in-the-loop AI: plan approval before generation, visible reasoning and cost, trust scores, guardrails and kill switches.

Experience

The Hackett Group (LeewayHertz)
PRODUCT DESIGNER, AI PLATFORMS / May 2025 – Present

ZBrain · Hackett's flagship agentic AI platform

- Own product design from proof of concept through 3 generations: IA, navigation and 3 design systems
- Shaped each generation with the CEO, CTO, head of design, BAs and PMs as the AI market moved, then scoped it with platform architects and AI dev teams
- Shipped 3 generations: agent crews and guardrails, a plan-approve-build Solution Builder, then governed Spaces with a kill switch
- Hackett engineers now deploy client agentic workflows on ZBrain; one global logistics client built 6 native apps among 80 AI solutions

AI XPLR · AI opportunity discovery and ROI platform

- Found client problem areas with Hackett consultants, BAs and the CTO, scoped with PMs, and built and shipped with the head of design and dev team
- Turned a one-size solution library into a client-first flow: company context, AI-guided intake, benchmarked ROI and a blueprint for ZBrain
- Shipped in AI XPLR 4.0 and 5.0; used by IBM Consulting, where one client process produced 18 AI use cases

Microsoft
UX DESIGNER (CONTRACT) / 2023 – 2025

CE Agent · MDM Copilot · Customer Zero Experience, 2024 – 2025

- Designed CE Agent, an AI agent that turns a Teams request into an Azure renewal plan inside MSX (Dynamics 365); delivered the Teams-to-quote flow in 6 weeks for 2 stakeholder demos, after exploring 7 layouts and 4 compare patterns
- Defined a 4-mode Copilot model (proactive, reactive, agentic, assistive) that set what Copilot may do on its own
- Handed off MDM Copilot Phase 1 in 2 months: 7 scenarios, failure states, prototype, success metrics and component kit

Enterprise email security · Microsoft Security, 2023 – 2024

- Proposed a unified threat-hunting workflow for an email security product used by Fortune 500 companies, from usage data and PM interviews: 3 analyst personas, 7 opportunity areas
- Mapped 4 setup journeys and proposed AI-guided onboarding across email, endpoint, identity and cloud apps

QAI | QGLUE
BRAND & COMMUNICATION LEAD / 2021 – 2023

- Led brand identity and marketing design across web, blog and podcast, and managed one designer
- Built the external communication strategy that aligned the brand with company goals

Independent Work

CrestOS
AI-NATIVE SEO SUITE / 2026
0-to-1 product where AI suggests fixes and people approve; 72-token design system and brand

Squirrel
EDTECH DASHBOARD / 2026
Student money dashboard for desktop, iPad and mobile from a 112-note audit

Ranbhoomi Kurukshetra
GAME DESIGN / 2023 – 2024
Art direction for a published strategy game; DNA Paris Design Awards 2024 winner

Maharashtra Police
EXHIBITION DESIGN / 2022 – 2023
Gadchiroli exhibition honouring police martyrs
